

GlobeTech Laboratories Ltd

Our aim is to substantially support the state's effort in developing the activity of Metrology and at the same time to offer our clients high quality services and complete solutions to their calibration and testing problems. It is our target to offer professional services that will result to the upgrading of the quality and eventually competitiveness of our customers in European and the global market.

Being a member of the EU, it is mandatory for Laboratories to conform to European and/or international standards. Furthermore, Laboratories are required to offer the highest level of quality. It has therefore become essential for Laboratories to implement ISO 17025 or EN 15189 as well as Good Laboratory Practices (GLP) standards in order to ensure immediate acceptability in the Local and European market environments.

LABORATORY QUALITY SYSTEMS

The key requirement of implementing and maintaining such quality systems is the calibration and verification of the laboratory equipment at regular intervals. With Laboratories having to place greater emphasis on quality, confidence in measurement is paramount. The experience of the highly qualified professional staff, along with a state-of-the-art Laboratory enables GlobeTech Laboratories to meet customer's requirements and conforming to the most exacting standards. Some of the equipment that Laboratories calibrate among others are Balances, Verification Weights, Thermometers, Temperature loggers, Water Baths, Incubators, Autoclaves, Glassware, Sterilizers, pH meters, Conductivity meters, thermocyclers, Refrigerators, Pipettes etc. as well as verification of clean rooms, safety cabinets etc.

RELIABLE CALIBRATION SERVICES

GlobeTech provides laboratories offer specialized calibration, validation and qualification services to ensure compliance with the stringent laboratory regulations, standards (ISO 17025 and EN 15189) and legislation as well as Good Laboratory Practices (GLP). As a leading provider of services, we offer expertise in ISO 17025, EN 15189 and GLP compliance. Our experienced team of professionals work closely with your quality assurance departments to ensure you meet the required standards. Furthermore our calibration laboratory is fully accredited and operate in accordance with the EN ISO / IEC 17025

ACCREDITATION & QUALITY POLICY

GlobeTech Laboratories is Accredited to ISO/IEC 17025 by RvA. GlobeTech policy in accordance with its Quality Manual is "To continuously improve and upgrade the organisation, its procedures and the professionalism of all the company's personnel so that the services provided are of the highest quality standard offered at the lowest possible cost".

The fully environmentally controlled Laboratory, which is supported by mobile units, is equipped with primary standards of high accuracy and operates in accordance with the international specifications set out by the guidelines of ISO 17025.

TRACEABILITY OF MEASUREMENTS

Laboratories must demonstrate traceability of their measurements in order to conform to ISO 17025 or EN 15189 standards as well as Good Laboratory Practices (GLP). Therefore calibration services from accredited laboratories must be obtained. GlobeTech Laboratories offered services fully fulfil this requirement of traceability to the National and/or International Standards.
