

Measurement Services Capabilities

Parameter	MEASUREMENT CAPABILITIES	
Noise Measurement & Analysis	<ul style="list-style-type: none"> - Noise measurement with spectrum analysis at work place - Noise pollution measurement with spectrum analysis - Machinery noise emissions measurement with spectrum analysis - Noise measurements and evaluation of noise criteria in buildings - etc. 	<ul style="list-style-type: none"> - ISO 18000 - ISO 14000 - Legislation
Illumination Measurement	<ul style="list-style-type: none"> - In factories - In offices - In kitchens - etc. 	<ul style="list-style-type: none"> - ISO 18000 - Legislation
Emissions Measurement	<ul style="list-style-type: none"> - Emission measurements - Boiler emission measurements - industry boilers - industrial emission - stack measurements - etc. 	<ul style="list-style-type: none"> - ISO 14000 - Legislation
Air Quality Measurement	<ul style="list-style-type: none"> - Indoor air quality - Outdoor air quality - Air analysis - etc 	<ul style="list-style-type: none"> - ISO 18000 - ISO 14000 - Legislation
Vibration Measurements	<ul style="list-style-type: none"> - at work platforms - on equipment - etc 	<ul style="list-style-type: none"> - ISO 18000 - Legislation
Dust Measurements	<ul style="list-style-type: none"> - at work place - in industries - ready mix plants - etc 	<ul style="list-style-type: none"> - ISO 18000 - Legislation
Slipperiness	<ul style="list-style-type: none"> - floors - working platforms - etc 	<ul style="list-style-type: none"> - ISO 18000
General measurements	<ul style="list-style-type: none"> - Particle count, clean rooms - asbestos - etc 	<ul style="list-style-type: none"> - General

On-site services are provided throughout the country.
